

# RUSSIAN ARBITRATION DAY 2022

**March - April 2022**

Russian Arbitration Day (RAD) – one of the largest and the most successful arbitration conferences in Russia – finally comes back offline.

Each year, RAD brings together leading experts from all over the globe. Since its launch in 2013, the conference is traditionally followed by a new issue of the digest *New Horizons of International Arbitration*.

The reports and articles for RAD and the digest are carefully selected on a competitive basis, which makes RAD a truly unique event not only for the community of legal practitioners, but also as a contribution to the legal academia as a whole.

Along with the RAD speakers selected by the moderators, the world-class international arbitrations specialists also take part in the conference and in the digest. In different years, among the RAD speakers were Gary Born, Loukas Mistelis, Audley Sheppard QC, V.V. Veeder QC, David Rivkin, Stavros Brekoulakis and other thought leaders of international arbitration.
